

## Transplant Pharmacy Services

**Nebraska Medicine offers unique pharmacy services, specifically for our transplant patients. The medications involved with transplantation are very important, yet can be intimidating and confusing. That is why we have services and team members to help you and your family prepare, understand and feel comfortable with the medications associated with your transplant.**

### **Pharmacy Financial Counselors**

Transplant pharmacy financial counselors are specialized personnel, knowledgeable of pharmacy and pharmacy benefits processes. Our pharmacy counselors will meet with you during your transplant evaluation to discuss insurance coverage and benefits, inform you of the potential medications and their costs, and answer any questions or concerns you and your family may have. They will remain a resource for you during the transplant journey and after transplantation. Their expertise provides a unique, individualized service that cannot be duplicated by any other facility.

### **Transplant pharmacy financial counselors can provide:**

- Verification of known insurance coverage
- Communication regarding available pharmacy benefits
- Knowledge of the many aspects of Medicare
- Access to patient assistance funds for medications to those who qualify
- Collaborative effort and direct contact with our outpatient pharmacy
- Availability to help with questions and concerns from the time of your evaluation to long after you return home

**Please bring a copy of your medication list, insurance cards and financial documentation to your transplant evaluation and meeting with your pharmacy financial counselor.**

## Nebraska Medicine - Pharmacy at Durham Outpatient Center

**Our outpatient pharmacy is conveniently located on the level two of the Durham Outpatient Center. As a reknown transplant center, the pharmacy routinely has transplant-specific medications available, and our pharmacists can help answer any questions regarding your transplant medications.**
